MAYOR

ROBERT F. BRACEY
DIRECTOR OF HEALTH

October 21, 2011

For your information, work on the new Compost Facility began this week. The new site is located just off the road into the existing facility. Over the next few weeks work will be conducted there that may impact traffic flow in and out of the facility. In addition, since the area is being cleared, there may be muddy conditions on the road. We are working to minimize this.

As you know the old site will be closed at the end of the current season and our goal is to have the new site open by early April.

Please let us know if you have any questions or concerns; and thank you for your patience during this phase
