Purpose of Impact Advisory Group (IAG) (from Council Resolution)

Advisory: “to advise the City in identifying the expected physical and social impacts of the Project, and determining their appropriate mitigation for consideration by the City, with the goal that, in the aggregate, the positive benefits of the Project will outweigh its negative impacts.”

Meet Monthly: “until commencement of the construction phase of the Project, and thereafter at the call of the chair of the IAG and until a certificate of occupancy is issued”

Consider Mitigation: “examples of appropriate mitigation of which the IAG may advise the City include, without limitation, temporary and/or permanent modifications to traffic and parking controls near the Project site, and measures to protect abutting properties from damage during construction.”
