## College and Career Readiness Programming Purpose

### DRAFT STATEMENT

Establish a 4 year program that allows students to explore their passions and interests while developing flexible post-secondary plan that supports a college and/or career path after high school.

# Guided by our Portrait of a Graduate

The NPS Technology Plan will be guided by the outcome of the NPS portrait of a graduate process. Below are some of the areas that are in development.

<b>SKILLS</b>	<b>KNOWLEDGE</b>	<b>MINDSETS</b>
Reading and Writing	Cultural Competency	Lifelong Learner
Critical Thinking	Financial Literacy	Flexibility, perseverance
Problem Solving	Numeracy, Data Literate	Growth Mindset
Communicating	Historical Understanding	Creative, entrepreneurial
Technology	Analyzing arguments	Curious
Learning to learn		Connected (local to global)

# Reimagining Educational Technology

The NPS technology plan supports our Reimagine strategies with instructional and operational hardware and software that will allow:

## Students to...

Design and Create

Explore and Envision

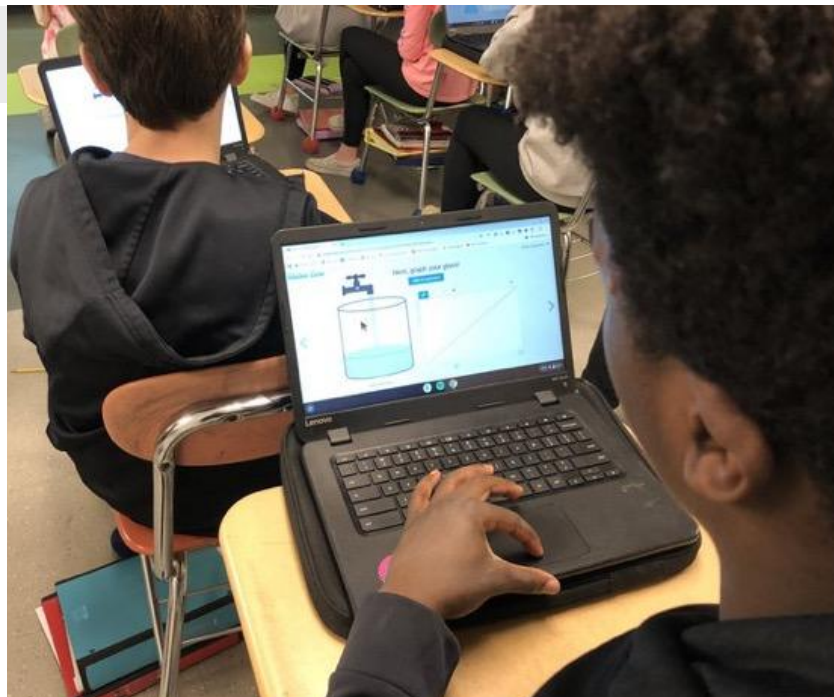

Organize and Plan

Experiment

Evaluate

Innovate

Communicate

## Educators to...

Personalize learning

Promote collaboration

Enhance feedback

Foster creativity and innovation

Help monitor student progress

Generate classroom synergy  
and curiosity

## OTHER BUDGET CONSIDERATIONS

NEASC Re-accreditation Preparation	The high school will begin the self-study for re-accreditation next school year. Funding will include stipends to support teacher co-chairs to lead the self-study.
Math/Science Tutor	This position will allow us to create math/science tutoring lab connected with our academic support and learning lab programs.
PSAT 10 + 11	This is one facet of the NHS college and career plan. By administering the PSAT yearly, the school will be able to reflect on the strength of its curriculum as well encourage students taking more advanced courses before graduating.
Technology Integration Specialist	For the past 2 years, NHS has explored possible models for a 1:1 computer device program. The addition of this position will support professional development around <a href="#">these goals in reimagining educational technology.</a>
