**Subject:** [Ext]Opposition to proposed project located at 22-24 Olive St.

*external e-mail use caution opening*

To Whom it May Concern:

I am writing in opposition to the proposed construction project located at 22-24 Olive Street. As the homeowner of 16 Russia Street for 25+ year, I can attest to significant changes in the neighborhood over the years. A quiet, quaint neighborhood is now consumed by large structures and reduced parking. Adding yet another large structure at Olive and Russia Streets will only add to the density and feeling of claustrophobia.

It is alarming that this proposal will put even more pressure on street parking. It only takes a quick drive around the neighborhood to see that parking is now at a premium. Removing spaces while adding population to the neighborhood makes navigating the area even more challenging than it already is.

It is also concerning that any green yard space seems to be fair game for replacement by yet another large structure. The neighborhood can only take so much. Where will the new owners/tenants have room for storage and equipment.

Building guidelines/restrictions were put in place for a reason, to protect and honor the integrity of the existing neighborhood and quality of life. Don't ruin it by allowing this structure to add yet again to the density and parking pressures. I oppose the recommended project at 22-24 Olive Street.

Respectfully yours,

Elise Klysa
