Hi Karen-

Please see the below comment from our recycling manager.

Katelyn- sorry for the delay getting back and you having to chase me down.....

The should allow 25 ft wide for each dumpster corral they put in. Each dumpster can needs 11 feet and since the city is looking at mandatory recycling city wide, then they probably want to have 2 dumpsters together.

Placement should allow for easy assess for both residents and the trash trucks who probably would use a front loader truck.

A front loader truck is 13.6 feet high and once lifted to empty with the dumpster is 22 feet high. if there are overhead wires they can pull the dumpster out into a driveway or parking area to empty.

Let me know if you need anything else from me on this.

Hi Molly-

Do you have any more feedback on the 3 Boston Way project regarding dumpster placement, size, etc?

Katelyn
