[To the Planning and Development Board:](#)

We are writing regarding the proposed rezoning and consideration of wind turbines on the Little River Nature Trail. This area is now a beautiful habitat for birds and animals. Many of us in the area walk this trail daily. This trail provides those of us who live along Rt 95 a buffer from its noise and the exhaust from all the cars on the highway. We do not want trees removed and animals displaced and the serenity of this trail obliterated. We do not want this trail to be re-zoned and we especially do not want wind turbines installed. We ask you to remove this trail from consideration for re-zoning and the installation of wind turbines. We do not support this proposal!
